Superior Productivity

- High production speeds
- Servo motor intelligence in key operating areas
- Multi-stage positive filling allows packing of difficult products, while also preventing product spillage
- Excellent production efficiencies

Versatility and Flexibility

- Quick complete size changeover
- Fully convertible from fill/seal system to form, fill and seal system.
- Compact footprint
- Economical price

Robert's introduces the Intermittent Motion series **IMFS 1500** Standup-Pouch System for the automatic filling and sealing of pre-made Standup/zipper style bags. The IMFS 1500 is built on the same construction criteria as Robert's C-Series continuous motion systems.

The IMFS-1500 will accommodate a minimum pouch size of 4" wide (x) 6" ht (x) 1" gusset through a maximum pouch size of up to 12" wide (x) 15" height with a maximum gusset of 5". This broad size range can accommodate a variety of retail and club store sizes. A complete size changeover can be performed in approximately 15 minutes.

A unique ability of the IMFS-1500 is that it is fully convertible from a fill/seal system to a form, fill and seal system. This new technology will benefit users with its compact footprint, increased flexibility, and economical price.

All Robert's systems are manufactured in the U.S.
